

To search the AndyCat catalog, click the link from our webpage.

You will be brought to an advanced search page where you can **search by keyword, title, author, subject, ISBN, and more.**

The screenshot shows the 'Advanced Search' interface. It features three horizontal search rows. Each row has a dropdown menu for 'Search Index' (Keyword, Title, Author) and a dropdown menu for 'Operator' (AND, OR, NOT). To the right of each row is a 'Search Term' input field. At the bottom right of the interface are three buttons: 'Add row' (with a plus icon), 'Clear', and a blue 'Search' button.

You may add **additional search fields** by clicking Add Row at the bottom right.

Use Boolean Operators And, Or, and Not as needed.

AND – both search terms must appear in results (EX: gun violence AND Marjory Stoneman Douglas High School)

OR – either search terms must appear in results (EX: gun violence OR school shootings)

NOT – when searching term with multiple contexts, differentiate using NOT (EX: school shootings NOT Columbine)

A selection of our **databases** (not all) is integrated in the AndyCat catalog. Use the dropdown menus to the right of the advanced search fields to select particular databases you wanted included or excluded in your search.

The screenshot shows the 'Database Selection' interface. It displays several groups of databases with selection checkboxes. The groups and their counts are: 'Databases' (1 Selected), 'Searching Databases' (1 Selected), 'WorldCat.org' (checked, OCLC catalog of books, articles, and other materials in libraries worldwide), 'OCLC Databases' (12 Databases), 'Other Databases' (1 Database), and 'All Databases' (13 Databases). Each group has a 'Select All in Group' button. At the top left is a radio button for 'Databases' and a 'Save Changes' button. At the top right are 'Reset' and '1 Selected' buttons.

There are a number of options available for specifying what you're looking for and getting the perfect result.

The screenshot shows a 'Search Tools' section with various filtering options:

- Only return peer-reviewed articles
- Open Access
- Group related editions

Format: All Formats

Year: e.g. 2010 through Optional

Language: All Languages

Audience: Any Audience

Content: Any Content

Checking the box for **peer-reviewed articles** will only return scholarly results. A peer-reviewed article has passed inspection by a panel of experts in its field.

You may **search by format**: book, map, newspaper, musical score, etc.

You may specify a particular **date range** for results. While this may not always be necessary in some courses, such as humanities, for science courses in particular it is best to only use results published in the last five years.

Other options include selecting a **language**, an **audience** (juvenile or adult), and **content** (fiction, nonfiction, thesis, etc.).

These options and more will appear in the left margin of your search result page, so you can always revise your search as you go.

To access **ebooks**, click the View eBook icon under availability.

Reducing gun violence : results from an intervention in East Los Angeles

by George Tita, Public Safety and Justice Program (Rand Corporation)
